Vital status

This figure is a heatmap visualization of genomic data across various clinical and demographic variables. The variables are listed on the right side of the heatmap, including Subtype, Stage, Metastasis, HER2 status, ER status, PR status, Menopausal status, Histology, Lymph node status, Race, Ethnicity, and Vital status. The heatmap shows a large number of genes (rows) across a large number of samples (columns). The color scale for the normalized RNA-seq data ranges from -3 (blue) to 3 (yellow). The heatmap is divided into two main sections: a top section with a color bar indicating Subtype (CIMLR1, CIMLR2) and Stage (Stage I, Stage II, Stage III, Stage IV, Unknown), and a bottom section with a color bar indicating Metastasis (No, Unknown, Yes). The bottom section also includes a color bar for HER2 status (Equivocal, Indeterminate, Negative, Positive, Unknown) and a color bar for PR status (Indeterminate, Negative, Positive, Unknown). The bottom section also includes a color bar for Menopausal status (Indeterminate, Perimenopausal, Post-menopausal, Pre-menopausal, Unknown) and a color bar for Histology (Infiltrating Carcinoma NOS, Infiltrating Ductal Carcinoma, Infiltrating Lobular Carcinoma, Medullary Carcinoma, Metaplastic Carcinoma, Mixed, Mucinous Carcinoma, Other, Unknown). The bottom section also includes a color bar for Lymph node status (No, Unknown, Yes) and a color bar for Race (American indian or alaska native, Asian, Black or african american, Unknown, White). The bottom section also includes a color bar for Ethnicity (Hispanic or latino, Not hispanic or latino, Unknown) and a color bar for Vital status (Alive, Dead, Unknown). The heatmap shows a large number of genes (rows) across a large number of samples (columns). The color scale for the normalized RNA-seq data ranges from -3 (blue) to 3 (yellow). The heatmap is divided into two main sections: a top section with a color bar indicating Subtype (CIMLR1, CIMLR2) and Stage (Stage I, Stage II, Stage III, Stage IV, Unknown), and a bottom section with a color bar indicating Metastasis (No, Unknown, Yes). The bottom section also includes a color bar for HER2 status (Equivocal, Indeterminate, Negative, Positive, Unknown) and a color bar for PR status (Indeterminate, Negative, Positive, Unknown). The bottom section also includes a color bar for Menopausal status (Indeterminate, Perimenopausal, Post-menopausal, Pre-menopausal, Unknown) and a color bar for Histology (Infiltrating Carcinoma NOS, Infiltrating Ductal Carcinoma, Infiltrating Lobular Carcinoma, Medullary Carcinoma, Metaplastic Carcinoma, Mixed, Mucinous Carcinoma, Other, Unknown). The bottom section also includes a color bar for Lymph node status (No, Unknown, Yes) and a color bar for Race (American indian or alaska native, Asian, Black or african american, Unknown, White). The bottom section also includes a color bar for Ethnicity (Hispanic or latino, Not hispanic or latino, Unknown) and a color bar for Vital status (Alive, Dead, Unknown).
